SuperCue Mini
Intelligent PPT clicker

|			
Ergonomic design	Automatic frequency-tuning	Other OS compatibility	Power display
100 meter remote control	Sensitive buttons	Bright laser	Plug and play

Product introduction

Supercue series products are professional PPT clicker for all kinds of press conferences, speeches, conferences, etc. The product is composed of remote control, receiver and cable. According to the configuration, it varies in three versions: Mini, standard and Pro. Supercue series products are new products independently developed in response to market demand. The trademark, appearance and core technology of Supercue products have been applied for national patents.

Key functions

1.433MHz digital communication technology with transmission distance over 50m

2.The transmission is more stable, the transmission distance is longer, and the stronger penetration

3.The indicator light provides communication status, and the display is more intuitive and accurate

4.Ergonomic design of remote control makes it more comfortable to hold

5.The remote control was embedded with a timer, and the speaker can clearly see the current state of narration

6.The remote control provides a timer display to clearly see the time on the page

7.Adopt rechargeable high capacity lithium batteries for easy use

8.Flexible channel setting, easier matching.

Most of the market similar products are Bluetooth/ 2.4G based communication technology, which incur complaints about short distance, interference and delay.

Other products VS **SuperCue**

Other products	Feature	SuperCue
Bluetooth / 2.4G	**Communication technology**	433MHz digital communication technology
<20m	**Transmission distance**	>50m
Susceptibility to inter-ference by WiFi and device over the same frequency	**Transmission anti interference**	Unique communica-tion frequency band, stronger anti-jamming ability
100-1000ms	**Transmission delay**	10-100ms
10mw	**Laser power**	30mw
Conventional pen shape design, poor user experience	**Ergonomics**	Ergonomic design, more comfortable to grip

Applications

Medium and small
conference room

multimedia classroom

Key function descriptions

- Remote control

1. Laser key: emit a 30 MW green laser
2. OLED screen: provide current channel, power information and timing information
3. On key: quick switch on and off
4. Forward button: corresponding to PPT / keynote "Next"button
5. Backward button: corresponding to PPT / keynote"Previous"button
6. Antenna: 433MHz high gain antenna

1. Power indicator / motion indicator

2. USB protection cover

3. USB: connect to win / Mac computer

▲ Configuration introduction

SuperCue Ministandard configuration:
remote control × 1
SuperCue Mini receiver × 1
packing box × 1

Application topology

Detailed parameters

Remote control

[size]	81*48*17mm
[power supply]	Polymer lithium battery
[weight]	140gram
[material]	Soft glue
[OLED screen]	Yes
[rechargeable]	Yes
[working hours]	20H
[power display]	Yes
[channel settings]	Yes
[number of channels]	9999
[timing prompt]	Yes
[laser power]	30mw
[vibration alert]	Yes
[ergonomics]	Yes

SuperCue Mini receiver

[size]	38mm*17mm*8mm
[power supply]	USB
[material]	Soft plastic
[weight]	20g

Function comparison of supercue receiver

The supercue remote control can be paired with different receivers to realize the functions for a variety of occasions.
The remote controller is universal, and customers can also purchase it separately.

Product / function	SuperCue Mini	SuperCue	SuperCue Pro
